PREFACE

CANSIM¹ (Canadian Socio-Economic Information Management System) is Statistics Canada's computerized data bank and its supporting software. The Alberta section of CANSIM contains data published by Alberta Bureau of Statistics and other Alberta Government Departments. It also contains Alberta subprovincial data published by Statistics Canada.

The CANSIM Summary Reference Index (Alberta Section) is the first step in obtaining time series data from the CANSIM Main Base. This reference manual summarizes the data bank contents by subject and source publication and provides primary (Matrix) identification numbers which form the key to the second part of the reference manual, the CANSIM Main Base Series Directory (Alberta Section), which also lists the time series contained in CANSIM in matrix number order. A 'matrix' in CANSIM contains a group of related time series data and is equivalent to a 'table' in a publication. As shown in the 'Guide to Effective Use of the CANSIM Main Base Series Directory' on Page i, the Series Directory contains titles and descriptive detail for each matrix and its component series. There are two identifiers for each series on the CANSIM Main Base: the series number to the left of the series title combines with the matrix number to form the CANSIM Identification Number, while the number at the right is the Databank Identification Number. Either the CANSIM or Databank identifier may be used to retrieve a series from the CANSIM Main Base. For detailed instruction on how to retrieve time series data from CANSIM, please consult the CANSIM Interactive System User's Manual, published by Statistics Canada, Catalogue No. 12-553.

NOTE: This publication contains both the Summary Reference Index and Series Directory for Alberta. It will be updated periodically if you would like your name added to our mailing list in order to receive amendments or if you require further information, please contact the Data Dissemination Unit, Alberta Bureau of Statistics (403 - 427-3058).
